Career Objective

PHP Full Stack Developer with 4+ years of experience building scalable web applications using Laravel, CodeIgniter, MySQL, JavaScript, and REST APIs. Strong expertise in backend architecture, admin dashboards, reporting systems, payment gateway integration, query optimization, and responsive UI development. Proven experience delivering enterprise solutions across vehicle leasing, import-export intelligence, restaurant booking, CMS, and portal systems.

Technical Skills

- **Backend:** PHP, Laravel, CodeIgniter, Core PHP, MVC, OOP, REST API, RBAC, JWT
- **Frontend:** HTML5, CSS3, Bootstrap, Tailwind, JavaScript (ES6), jQuery, React.js, AJAX
- **Database:** MySQL, MongoDB, Complex Joins, Query Optimization, Reporting
- **Tools:** Git, Postman, VS Code, XAMPP, Linux Server, cPanel, Cron Jobs

Professional Experience

PHP Developer | PI Softek Ltd | (May 2023 – Present)

(Key Responsibilities & Contributions)

- Developed and maintained 8+ production-grade web applications using Laravel and CodeIgniter for leasing, hospitality, trade, and CMS domains.
- Built scalable backend modules, REST APIs, role-based authentication, reusable components, and optimized MySQL/MongoDB operations.
- Designed Vehicle Leasing Management System with customer, admin, driver, lease, statement emails, duplicate prevention, and reporting dashboards.
- Developed Import-Export Data Intelligence platform using complex joins across huge datasets, advanced filtering, Excel exports, and custom reports.
- Integrated Stripe, Razorpay, and PayPal payment gateways with webhook validation and transaction reconciliation.
- Automated SMTP email workflows, scheduled reports, and notification systems using cron-based jobs.
- Improved performance through validations, exception handling, code refactoring, and query optimization.

PHP Developer | Gaura Softwares | (6 months)

- Developed business portals using **Core PHP, HTML, CSS, Bootstrap, JavaScript & MySQL**.
- Built **backend modules, UI scaffolding, and database schemas**.

- Delivered a **Government Forum Web Platform** from scratch.
- Strengthened production deployment workflows and UI responsiveness.

Key Projects

Vehicle Leasing Management System

- Developed a **multi-user leasing management system** with Admin, Bank, and Customer workflows.
- Implemented **role-based authentication, authorization, validations**, and secure user access controls.
- Built template-based **PDF statement and document generation** using third-party libraries.
- Automated **scheduled statement emails** for customers, banks, and admin users.
- Created custom reports, dashboards, and analytics modules for lease tracking.

Import-Export Data Platform

- Developed a **scalable trade data platform** with HS code filtering, country-wise search, and import-export analytics dashboards.
- Built **advanced reporting modules, custom filters, downloadable reports, and data visualization dashboards** for market insights.
- Designed a **dynamic admin panel with CMS, SEO pages, and content management modules** for easy platform updates.
- Integrated **third-party APIs for countries, HS codes, and global trade datasets** with automated data synchronization services.
- Improved performance using **database indexing, optimized queries, pagination, export modules, and scalable REST API architecture**.

Restaurant Booking Platform

- Developed a multi-restaurant booking and management platform with super admin controls.
- Built restaurant admin login, menu management, booking, and order modules.
- Implemented Excel import/export for menu items, reports, and sales data.
- Created sales dashboards, revenue reports, and order analytics.
- Added automated email notifications for bookings, orders, and customer updates.

Education

- **Advance Diploma in Software Engineering** (3 years) – NIELIT/IICS
- **B.Com (Hons)**, 2020 – Delhi University

Strengths

- Self-confidence & positive attitude and Strong time management & multitasking
- Quick learner & problem Solver and Organized and dedicated to continuous improvement
